How does your company resolve environmental issues?

If the first words that come to mind are “not well” or “not at all”, it is a sign your company is exposing itself to significant legal and financial risk. Too often a company learns the hard way just how its operations impact the environment and how the environment impacts its business.

Which of these issues are you facing today?

- Leaking Tanks
- Notice of Violations
- Safety Hazards
- Spills
- Contaminated Property
- Hazardous Waste
- Liability Exposure
- Litigation
- EHS Management
- Permits
- Regulatory Compliance
- Remediation
- Water Supply
- Waste Disposal
- Rising Energy Costs
- Carbon Footprint Concerns
- Environmental Planning
- Environmental Sustainability

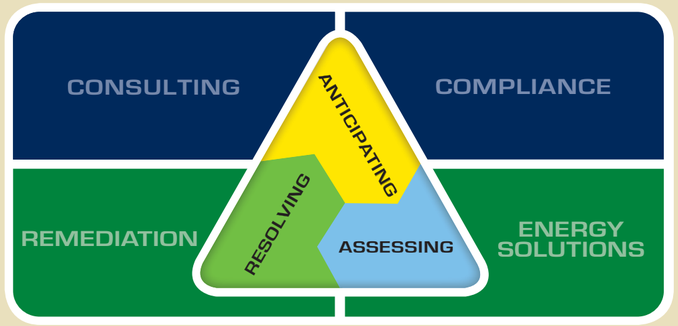
THE **EMS** ADVANTAGE



How EMS Environmental can help

We focus on a single primary objective: developing realistic solutions that satisfy regulations and resolve environmental issues while minimizing disruption to our client's daily business activities.

The ability to effectively address concerns before they cause harm to your company's reputation and balance sheet is critical in today's business environment. That ability is where EMS Environmental delivers real value to our clients. Our experience enables us to rapidly evaluate the magnitude and impact of the situation at hand, so your business gets the right response - **a comprehensive solution that is in proportion to your needs** - and ensures your exposure has been contained or your opportunity maximized.
